Instructions: Each month make a rough estimate of the hours you have worked on your allotment and the money you have spent and enter these figures in the appropriate cell. Include expenditure that will be repeated annually, for example on seeds, fertiliser, compost..... do not include expenditure on one off purchases such as sheds, greenhouses or big tools. In the left hand column give a rough estimate of the area planted with a crop. For crop type you can choose whether to combine all varieties of a particular type e.g. all lettuces, or to distinguish between e.g. lettuce(cos) lettuce(tom thumb).... Each week note the quantity of crop you have harvested as appropriate e.g. weight of beans, number of lettuces or flowers. Please try to indicate how you have weighed/measured. The totals should be calculated automatically. Months have been divided into 4 weeks. This is not totally accurate - but just add extra days into the nearest week.

	April	May	June	July	August	September
Hours Worked:						
Money Spent:						

Area	Crop Type	1	2	3	4	1	2	3	4	1	2	3	4	1	2	3	4	1	2	3	4	1	2	3	4	Total
